

Royal
Botanic Garden
Edinburgh

Fourth meeting of the Scottish Phylogeny Discussion
Group

Professor Tim Barraclough

Imperial College

“Evolutionarily significant units of diversity above the species level”

This seminar will be followed by talks by a range of researchers based in Scotland, including:

Kyle Dexter (Royal Botanic Garden Edinburgh/University of Leeds) “Phylogenetics, Conservation, and Ecology of South American Trees”

Magali Schweizer (University of Edinburgh) “Interdisciplinary study of benthic foraminifers (Rhizaria): between micropalaeontology and molecular phylogenetics”

Sally Street (University of St Andrews) “Using phylogenetic comparative statistical methods to study sexual selection in primates”

Tom Meagher (University of St Andrews) “Landscape-level processes in plant conservation”

**Location: Royal Botanic Garden Edinburgh,
Conference Room**

13 June 2012, 1 PM to 5:30 PM

For free registration (includes a free lunch!) and further details, see: <http://biology.st-andrews.ac.uk/cegg/spdg>
